Arthur Pequegnat

Producto nº

297

Here is a handsome wall clock which is a scaled replica of the famous Canadian ti clock manufactured by Arthur Pequegnat during the late 1800s. The original clocks were much larger and often used in institutional buildings. The size of this case is suitable for a home and it can be assembled in one evening.

Easy to Assemble Case Kit

The kit includes all pieces mitred and cut to size, and a pre-assembled door. The glass is included, as are the instructions, drawings and hardware.

Height 29" (737 mm)
 Width 14.375" (365 mm)
 Depth 4.875" (124 mm)
 Weight 12 lbs. (5.5 kg)

Vienna regulator clocks were made in large numbers in Austria and Germany during the 1800s, and were so popular that American clock makers produced many of this type. European clocks were weight driven while the American cases were either spring or weight driven. We chose to reproduce a case called the Capitol, made by the Ansonia Clock Company and winner of the Design Award at the 1878 Paris Exposition.
